SUMMER EDITION
PART II

The children had a big surprise this month and got the opportunity to see a rare sight. We discovered some wood beetle larvae inside a rotting stump. They were fascinated by the shape, colour and movement.

It's been a while but we returned to Harborne Walkway for a trip with some of the toddlers and preschoolers. They discovered a den and were engrossed on collecting stones in the stream, using their fishing nets.

SUMMER EDITION
PART II

In the last couple of weeks the children have been harvesting sunflower seeds from the sunflower heads as well as some potatoes they had planted.

This month we started Forest School sessions with the babies and they have been enjoying exploring the space. They have particularly enjoyed using the mud kitchen area and transferring water mixed with herbs from different containers.
