JULY EDITION

*This month we have been continuing to construct and build lots of dens and bridges with branches, twigs, tarpaulin and twine. The children have enjoyed quiet independent play as well as working together in groups to create mini hideouts.*

*The preschoolers had a rare opportunity to see tree sap that had seeped out of the outer bark and crystalised, they were amazed to learn that the sap contains all the sugars the trees uses to grow. They also learnt that the sap of the maple tree was called maple syrup!*

JULY EDITION

*The children have been spotting some new insects this month. We have seen many cabbage butterflies near the garden bed, lots of bees and even caterpillars!*

*The children have been exploring digging and concealing items in the sand since receiving their new sandpit. It has been a big hit both in warm and wet weathers.*
