MARCH

Spring has finally arrived and the children have been very busy sowing seeds and chitting their potatoes.

It's so lovely to see the children supporting their peers in so many different ways, especially during physical activities involving climbing and balancing.

MARCH

Here one of our children is demonstrating using the garden riddle to sift the compost from last year. This helps to separate larger material such as bark, twigs and roots from last year's plants.

The children get very excited to see the garlic and tulips every week. They have been monitoring their growth and take initiative to water the plants themselves.

MARCH

The children have been practising their fine motor skills and pincer grip whilst making their Spring cookies. They chose their own spring themed cutters and sprinkled dried flowers and leaves inside.

The children have been brightening up the Forest School area with all their wonderful mark making. They have been using chalks, acrylic pens and painted with mud!
